a. Professional Management

Management of investment portfolios, selecting banks, determining the time frame for placement and administration of investments requires systematic analysis, continuous monitoring and fast and precise investment decisions (market timing). In addition, special expertise and relationships with various parties are required to be able to manage a diversified investment portfolio. This will take a lot of time and concentration for the Unit Holder if done alone. Through UOBAM ESG PASAR UANG INDONESIA, Participation Unit Holders will get convenience as they are free from the work mentioned above and entrust the work to an Investment Manager who is a professional in their field.

b. Investment Diversification

For investments other than securities issued by Bank Indonesia or the Government of Indonesia which have the lowest risk, investment diversification is necessary to reduce investment risk. If the investment funds held are relatively small, it is difficult to obtain diversification benefits without losing the opportunity to obtain good investment returns. Through UOBAM ESG PASAR UANG INDONESIA where funds from various parties can be collected, investment diversification can be easier to be performed.

c. Investment Value Growth Potential

With the accumulation of funds from various parties, UOBAM ESG PASAR UANG INDONESIA has bargaining power in obtaining higher interest rates and lower investment costs, as well as access to investment instruments that are difficult if done individually. This provides equal opportunities for all Unit Holders to obtain relatively good investment returns according to the level of risk.

d. Easy Investment Disbursement

Open Mutual Funds enable Participation Unit Holders to redeem Participation Units on every Exchange Day by reselling their Participation Units to the Investment Manager. This provides a high level of liquidity for the Participation Unit Holder

Meanwhile, the investment risk in UOBAM ESG PASAR UANG INDONESIA can be caused by several factors, including:

1. Risk of Changing Economic and Political Conditions

Changes or worsening of economic and political conditions at home or abroad or changes in regulations can affect income perspectives which can also have an impact on the performance of banks and securities issuers or parties in which UOBAM ESG PASAR UANG INDONESIA invests. The Investment Manager will try to provide the best investment return to the Unit Holder. However, in exceptional circumstances the securities issuer in which UOBAM ESG PASAR UANG INDONESIA invests or other parties related to UOBAM ESG PASAR UANG INDONESIA may default in fulfilling their obligations. This will affect the investment results of UOBAM ESG PASAR UANG INDONESIA.

3. Liquidity Risk

In the event of a very high level of redemption by the Unit Holder in a short period of time, the cash payment by the Investment Manager by means of withdrawing the UOBAM ESG PASAR UANG INDONESIA portfolio may be delayed. In extraordinary conditions (force majeure) or events (both predictable and unpredictable) beyond the control of the Investment Manager, the

resale may also be temporarily suspended in accordance with the provisions in the Collective Investment Contract and OJK Regulations.

4. Risk of Reduction in Net Asset Value of Each Participation Unit

The value of each Participation Unit in UOBAM ESG PASAR UANG INDONESIA may change due to an increase or decrease in the Net Asset Value of the Mutual Fund concerned. Custodian Bank
Reksa Dana UOBAM ESG Pasar Uang Indonesia****Opinion**

We have audited the financial statements of Reksa Dana UOBAM ESG Pasar Uang Indonesia (the Mutual Fund), which comprise the statement of financial position as of December 31, 2023, and the statements of profit or loss and other comprehensive income, changes in net assets, and cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Reksa Dana UOBAM ESG Pasar Uang Indonesia as of December 31, 2023, and its financial performance and cash flows for the year then ended, in accordance with Indonesian Financial Accounting Standards.

Basis for Opinion

We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Mutual Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Indonesia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibility of Investment Manager and Custodian Bank for the Financial Statements

Investment Manager and Custodian Bank are responsible for the preparation and fair presentation of such financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as Investment Manager and Custodian Bank determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Dalam penyusunan laporan keuangan, Manajer Investasi dan Bank Kustodian bertanggung jawab untuk menilai kemampuan Reksa Dana dalam mempertahankan kelangsungan usahanya, mengungkapkan, sesuai dengan kondisinya, hal-hal yang berkaitan dengan kelangsungan usaha, dan menggunakan basis akuntansi kelangsungan usaha, kecuali Manajer Investasi dan Bank Kustodian memiliki intensi untuk melikuidasi Reksa Dana atau menghentikan operasi, atau tidak memiliki alternatif yang realistis selain melaksanakannya.

Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan mempengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.
- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Reksa Dana.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh Manajer Investasi dan Bank Kustodian.

In preparing the financial statements, Investment Manager and Custodian Bank are responsible for assessing the Mutual Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Investment Manager and Custodian Bank either intends to liquidate the Mutual Fund or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Mutual Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Investment Manager and Custodian Bank.

- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh Manajer Investasi dan Bank Kustodian dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Reksa Dana untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Reksa Dana tidak dapat mempertahankan kelangsungan usaha.
 - Mengevaluasi penyajian, struktur, dan isi laporan keuangan secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.
- Conclude on the appropriateness of Investment Manager and Custodian Bank's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Mutual Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Mutual Fund to cease to continue as a going concern.
 - Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Kami mengomunikasikan kepada Manajer Investasi dan Bank Kustodian mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit, serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

We communicate with Investment Manager and Custodian Bank regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Dalam melakukan penilaian, Reksa Dana membandingkan antara risiko gagal bayar yang terjadi atas instrumen keuangan pada saat periode pelaporan dengan risiko gagal bayar yang terjadi atas instrumen keuangan pada saat pengakuan awal dan mempertimbangkan kewajaran serta ketersediaan informasi, yang tersedia tanpa biaya atau usaha pada saat tanggal pelaporan terkait dengan kejadian masa lalu, kondisi terkini dan perkiraan atas kondisi ekonomi di masa depan, yang mengindikasikan kenaikan risiko kredit sejak pengakuan awal.

To make that assessment, the Mutual Fund compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and consider reasonable and supportable information, that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions, that is indicative of significant increases in credit risk since initial recognition.

(2) Liabilitas Keuangan

Liabilitas keuangan dihentikan pengakuannya jika liabilitas keuangan tersebut berakhir, dibatalkan, atau telah kadaluarsa.

e. Pengukuran Nilai Wajar

Pengukuran nilai wajar didasarkan pada asumsi bahwa transaksi untuk menjual aset atau mengalihkan liabilitas akan terjadi di pasar utama untuk aset atau liabilitas tersebut atau, jika terdapat pasar utama, di pasar yang paling menguntungkan untuk aset atau liabilitas tersebut:

Reksa Dana harus memiliki akses ke pasar utama atau pasar yang paling menguntungkan pada tanggal pengukuran.

Reksa Dana memaksimalkan penggunaan input yang dapat diobservasi yang relevan dan meminimalkan penggunaan input yang tidak dapat diobservasi.

e. Fair Value Measurement

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability or, the absence of a principal market, in the most advantageous market for the asset or liability.

The Mutual Fund must have access to the principal or the most advantageous market at the measurement date.

The Mutual Fund maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs.

Seluruh aset dan liabilitas selain sukuk dikategorikan dalam hierarki nilai wajar sebagai berikut:

- Level 1 - harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik;
- Level 2 - teknik penilaian dimana level input terendah yang signifikan terhadap pengukuran nilai wajar dapat diobservasi, baik secara langsung maupun tidak langsung;
- Level 3 - teknik penilaian dimana level input terendah yang signifikan terhadap pengukuran nilai wajar tidak dapat diobservasi.

Nilai wajar sukuk diklasifikasikan dengan menggunakan hierarki nilai wajar sebagai berikut:

- Level 1 - harga kuotasian (tanpa penyesuaian) di pasar aktif, atau
- Level 2 - input selain harga kuotasian (tanpa penyesuaian) di pasar aktif, yang dapat diobservasi.

Untuk aset dan liabilitas yang diukur pada nilai wajar secara berulang dalam laporan keuangan, maka Reksa Dana menentukan apakah terdapat transfer di antara level hierarki dengan menilai kembali pengkategorian pada setiap akhir periode pelaporan.

f. Pengakuan Pendapatan dan Beban

Pendapatan diakui ketika kemungkinan besar manfaat ekonomi masa depan akan mengalir ke Reksa Dana dan manfaat ini dapat diukur secara andal.

Pendapatan bunga dan bagi hasil diakui berdasarkan proporsi waktu dalam laba rugi, termasuk pendapatan dari jasa giro, instrumen pasar uang, efek utang dan sukuk yang diukur pada nilai wajar melalui laba rugi, setelah mengeluarkan pajak penghasilan final.

Beban investasi termasuk pajak penghasilan final diakui secara akrual dan harian.

All assets and liabilities other than sukuk are categorized within the fair value hierarchy as follows:

- Level 1 - quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 - valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;
- Level 3 - valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Fair value of sukuk is determined by hierarchy as follows:

- Level 1 - quoted (unadjusted) market prices in active markets, or
- Level 2 - observable input except quoted (unadjusted) market prices in active markets.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Mutual Fund determines whether there are transfers between levels in the hierarchy by re-assessing categorization at the end of each reporting period.

f. Income and Expense Recognition

Income is recognized to the extent that it is probable that the future economic benefits will flow to the Mutual Fund and these benefits can be reliably measured.

Interest income and profit sharing is recognized on a time-proportionate basis in profit or loss, which includes income from cash in banks, money market instruments, debt instruments and sukuk which are measured at FVPL, after excluding final income tax.

Investment expenses including final income tax are accrued on a daily basis.

Keuntungan atau kerugian investasi yang belum direalisasi akibat kenaikan atau penurunan harga pasar (nilai wajar) serta keuntungan atau kerugian investasi yang telah direalisasi disajikan dalam laba rugi. Keuntungan dan kerugian yang telah direalisasi neto atas penjualan portofolio efek dihitung berdasarkan harga pokok yang menggunakan metode rata-rata tertimbang.

i. Peristiwa Setelah Periode Pelaporan

Peristiwa-peristiwa yang terjadi setelah periode pelaporan yang menyediakan tambahan informasi mengenai posisi keuangan Reksa Dana pada tanggal laporan posisi keuangan (peristiwa penyesuaian), jika ada, telah tercermin dalam laporan keuangan. Peristiwa-peristiwa yang terjadi setelah periode pelaporan yang tidak memerlukan penyesuaian (peristiwa non-penyesuaian), apabila jumlahnya material, telah diungkapkan dalam laporan keuangan.

3. Penggunaan Estimasi, Pertimbangan, dan Asumsi

Dalam penerapan kebijakan akuntansi, seperti yang diungkapkan dalam Catatan 2 atas laporan keuangan, Reksa Dana harus membuat estimasi, pertimbangan, dan asumsi atas nilai tercatat aset dan liabilitas yang tidak tersedia oleh sumber-sumber lain. Estimasi dan asumsi tersebut berdasarkan pengalaman historis dan faktor lain yang dipertimbangkan relevan.

Pengungkapan berikut mencakup ikhtisar estimasi, pertimbangan, dan asumsi signifikan yang berpengaruh terhadap jumlah-jumlah yang dilaporkan serta pengungkapan dalam laporan keuangan.

Pertimbangan

Pertimbangan-pertimbangan berikut dibuat dalam proses penerapan kebijakan akuntansi Reksa Dana yang memiliki dampak yang paling signifikan terhadap jumlah-jumlah yang diakui dalam laporan keuangan:

a. Mata Uang Fungsional

Mata uang fungsional Reksa Dana adalah mata uang lingkungan ekonomi utama dimana Reksa Dana beroperasi. Mata uang tersebut, antara lain, adalah yang paling mempengaruhi nilai portofolio efek dan unit penyertaan, mata uang dari negara yang kekuatan persaingan dan peraturannya sebagian besar menentukan nilai portofolio efek dan unit penyertaan, dan merupakan mata uang yang mana dana dari aktivitas pendanaan dihasilkan.

i. Events after the Reporting Period

Post year-end events that provide additional information about the statement of financial position at the reporting date (adjusting event), if any, are reflected in the financial statements. Post year-end events that are not adjusting events are disclosed in the notes to the financial statements when material.

3. Use of Estimates, Judgments, and Assumptions

In the application of the accounting policies, which are described in Note 2 to the financial statements, the Mutual Fund is required to make estimates, judgments, and assumptions about the carrying values of assets and liabilities that are not readily apparent from other sources. The estimates and assumptions are based on historical experience and other factors that are considered to be relevant.

The following disclosures represent a summary of the significant estimates, judgments, and assumptions that affected certain reported amounts and disclosures in the financial statements.

Judgments

The following judgments are made in the process of applying the Mutual Fund's accounting policies that have the most significant effects on the amounts recognized in the financial statements:

a. Functional Currency

The Mutual Fund's functional currency is the currency of the primary economic environment in which the Mutual Fund operates. It is the currency, among others, that mainly influences the values of investment portfolios and units, of the country whose competitive forces and regulations mainly determine the value of investment portfolios and units, and the currency in which funds from financing activities are generated.

b. Klasifikasi Aset Keuangan dan Liabilitas Keuangan

Reksa Dana menentukan klasifikasi aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan menilai apakah aset dan liabilitas tersebut memenuhi definisi yang ditetapkan dalam PSAK No. 71. Aset keuangan dan liabilitas keuangan dicatat sesuai dengan kebijakan akuntansi Reksa Dana sebagaimana diungkapkan dalam Catatan 2.

c. Cadangan Kerugian Penurunan Nilai Aset Keuangan

Pada setiap tanggal laporan posisi keuangan, Reksa Dana menilai apakah risiko kredit atas instrumen keuangan telah meningkat secara signifikan sejak pengakuan awal. Ketika melakukan penilaian tersebut, Reksa Dana mempertimbangkan perubahan risiko gagal bayar yang terjadi selama umur instrumen keuangan. Dalam melakukan penilaian tersebut, Reksa Dana membandingkan risiko gagal bayar yang terjadi pada tanggal pelaporan dengan risiko gagal bayar pada saat pengakuan awal, serta mempertimbangkan informasi, termasuk informasi masa lalu, kondisi saat ini, dan informasi bersifat perkiraan masa depan (*forward-looking*), yang wajar dan didukung yang tersedia tanpa biaya atau upaya berlebihan.

Reksa Dana mengukur cadangan kerugian sepanjang umurnya, jika risiko kredit atas instrumen keuangan tersebut telah meningkat secara signifikan sejak pengakuan awal, jika tidak, maka Reksa Dana mengukur cadangan kerugian untuk instrumen keuangan tersebut sejumlah kerugian kredit ekspektasian 12 bulan. Suatu evaluasi yang bertujuan untuk mengidentifikasi jumlah cadangan kerugian kredit ekspektasian yang harus dibentuk, dilakukan secara berkala pada setiap periode pelaporan. Oleh karena itu, saat dan besaran jumlah cadangan kerugian kredit ekspektasian yang tercatat pada setiap periode dapat berbeda tergantung pada pertimbangan atas informasi yang tersedia atau berlaku pada saat itu.

b. Classification of Financial Assets and Financial Liabilities

The Mutual Fund determines the classifications of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in PSAK No. 71. The financial assets and financial liabilities are accounted for in accordance with the Mutual Fund's accounting policies disclosed in FNote 2.

c. Allowance for Impairment of Financial Assets

At each financial position reporting date, the Mutual Fund shall assess whether the credit risk of a financial instrument has increased significantly since initial recognition. When making the assessment, the Mutual Fund shall use the change in the risk of a default over the expected life of the financial instrument. To make that assessment, the Mutual Fund shall compare the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and consider reasonable and supportable information, including that which is forward-looking, that is available without undue cost or effort.

The Mutual Fund shall measure the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition, otherwise, the Mutual Fund shall measure the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. Evaluation of financial assets to determine the allowance for expected credit loss to be provided is performed periodically in each reporting period. Therefore, the timing and amount of allowance for expected credit loss recorded at each period might differ based on the judgments and estimates that are available or valid at each period.

d. Pajak Penghasilan

Pertimbangan yang signifikan dibutuhkan untuk menentukan jumlah pajak penghasilan. Terdapat sejumlah transaksi dan perhitungan yang menimbulkan ketidakpastian penentuan jumlah pajak penghasilan karena interpretasi atas peraturan pajak yang berbeda. Jika hasil pemeriksaan pajak berbeda dengan jumlah yang sebelumnya dibukukan, maka selisih tersebut akan berdampak terhadap aset dan liabilitas pajak kini dan tangguhan dalam periode dimana hasil pemeriksaan tersebut terjadi.

Estimasi dan Asumsi

Asumsi utama mengenai masa depan dan sumber utama lain dalam mengestimasi ketidakpastian pada tanggal pelaporan yang mempunyai risiko signifikan yang dapat menyebabkan penyesuaian material terhadap nilai tercatat aset dan liabilitas dalam periode berikutnya diungkapkan di bawah ini. Estimasi dan asumsi didasarkan pada parameter yang tersedia saat laporan keuangan disusun. Kondisi yang ada dan asumsi mengenai perkembangan masa depan dapat berubah karena perubahan situasi pasar yang berada di luar kendali Reksa Dana. Perubahan tersebut tercermin dalam asumsi ketika keadaan tersebut terjadi.

Nilai Wajar Aset Keuangan

Standar Akuntansi Keuangan di Indonesia mensyaratkan pengukuran aset keuangan tertentu pada nilai wajarnya, dan penyajian ini mengharuskan penggunaan estimasi. Komponen pengukuran nilai wajar yang signifikan ditentukan berdasarkan bukti objektif yang dapat diverifikasi (seperti nilai tukar, suku bunga), sedangkan saat dan besaran perubahan nilai wajar dapat menjadi berbeda karena penggunaan metode penilaian yang berbeda.

Nilai wajar portofolio efek diungkapkan pada Catatan 11.

d. Income Taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain due to different interpretation of tax regulations. Where the final tax outcome of these matters is different from the amount that were initially recorded, such differences will have an impact on the current and deferred income tax assets and liabilities in the period in which such determination is made.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying values of assets and liabilities within the next financial period are disclosed below. The estimates and assumptions are based on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes on circumstances arising beyond the control of the Mutual Fund. Such changes are reflected in the assumptions when they occur.

Fair Value of Financial Assets

Indonesian Financial Accounting Standards require measurement of certain financial assets at fair values, and the disclosure requires the use of estimates. Significant component of fair value measurement is determined based on verifiable objective evidence (i.e. foreign exchange rate, interest rate), while timing and amount of changes in fair value might differ due to different valuation method used.

The fair values of investment portfolios are set out in Note 11.

11. Pengukuran Nilai Wajar

Nilai wajar instrumen keuangan yang diperdagangkan di pasar aktif adalah berdasarkan kuotasi harga pasar pada tanggal pelaporan. Pasar dianggap aktif apabila kuotasi harga tersedia sewaktu-waktu dan dapat diperoleh secara rutin dari bursa, pedagang atau perantara efek, badan penyedia jasa penentuan harga kelompok portfoli, atau badan pengatur, dan harga tersebut mencerminkan transaksi pasar yang aktual dan rutin dalam suatu transaksi yang wajar. Instrumen keuangan seperti ini termasuk dalam hierarki Level 1.

Nilai wajar instrumen keuangan yang tidak diperdagangkan di pasar aktif ditentukan menggunakan teknik penilaian. Teknik penilaian ini memaksimalkan penggunaan data pasar yang dapat diobservasi yang tersedia dan sesedikit mungkin mengandalkan estimasi spesifik yang dibuat oleh Manajer Investasi. Karena seluruh input signifikan yang dibutuhkan untuk menentukan nilai wajar dapat diobservasi, maka instrumen tersebut termasuk dalam hirarki Level 2.

11. Fair Value Measurement

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer or broker, industry group pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transaction on an arm's lengths basis. These instruments are included in Level 1.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on Investment Manager's specific estimates. Since all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.
